

FEELINGS GROUP

VISUAL AI FOR ALL

Reference Letter

To Whom It May Concern,

I am writing to recommend **Mr. Zhao Xuecen (Jack)**, who interned as **AI Technical Intern** at Feelings Group Limited from January 14 to February 10, 2026. During this period, Jack contributed to the feelings-world project under my supervision. He demonstrated good skill as a software developer.

Technical Proficiency: Jack has shown good ability in full-stack development, implementing functional features such as 3D scene management, multiplayer capabilities, and database integration. His work demonstrates solid understanding of data modeling and backend architecture.

3D World Development: Jack developed 3D world capabilities including physics integration, camera mode controls (fly/walker), and avatar support. He implemented keyboard shortcuts for toggling physics and view modes, enhancing the user experience of the 3D environment.

Multiplayer & Real-time Features: Jack built multiplayer functionality with a socket server, enabling auto-create rooms and room management. He implemented real-time player synchronization and mobile joystick controls for cross-device compatibility.

Database & Backend: Jack handled SQLite database integration with proper error handling. He created scripts for database initialization, migration, and seeding, along with verification tools to ensure data integrity.

Admin UI: His contributions include model editing features with scale transform support, delete shortcuts, and UI improvements. He added keyboard shortcuts (1: move, 2: rotate, 3: scale) for efficient editing workflows.

Problem-Solving & Collaboration: Jack is proactive in seeking help when facing challenges rather than getting stuck on his own. He delivers what is asked of him and maintains good communication with the team. When issues arise, he addresses them directly and learns from feedback.

Work Ethic & Teamwork: Jack is punctual and self-motivated, consistently meeting project deadlines. He demonstrates strong ability to learn new technologies and applies them effectively in his work.

I recommend Jack for any software development role where he can continue to grow and contribute.

Sincerely,
Beeno Tung
Co-founder & Tech Lead
